DETAILED ACTION

1. Claims 1- 9 are pending.
2. In the Response filed October 9, 2007, Group I, claims 1-9 has been elected with traverse.
3. In the Preliminary Amendment filed October 9, 2007, claims 10 and 11 have been canceled.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-3, 5, and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is suggested that the phrase "and salts" should be amended to read in the alternative, "or a salt".

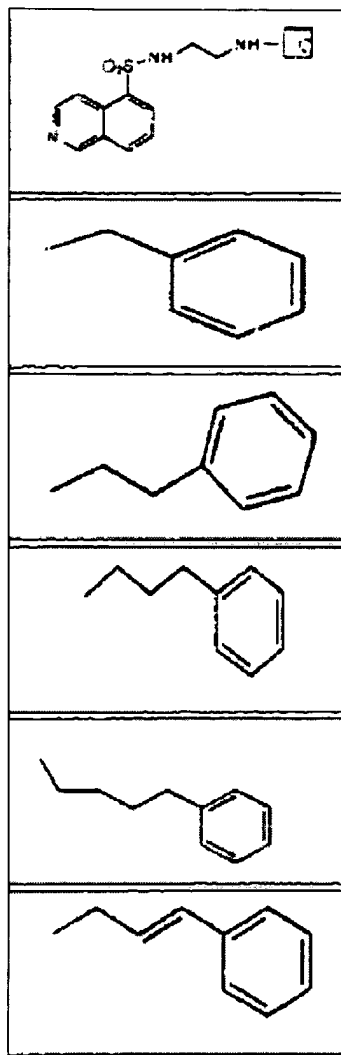

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1, 7 and 8 rejected under 35 U.S.C. 103(a) as being unpatentable over Reuveni et al (Reference CA) in view of Peptor, LTD. (Reference BA).

The instantly claimed compounds are disclosed. At page 10309, Table 1, 1st column, see the compounds depicted below:

**This
compound =>**

The difference between the prior art compounds and the instantly claimed compounds is the 7- position of the isoquinoline ring which represents phenyl.

Peptor, LTD. teaches a similar class of isoquinoline compounds. See the claims of the '754 patent. At the 7- position of the isoquinoline ring, Peptor, LTD. teaches the equivalency of hydrogen and phenyl. See the radical R₅.

Accordingly, it would have been obvious to one of ordinary skill in the art to replace the 7-hydrogen in a compound of Reference CA with a known equivalent such

as 7-phenyl in view of the teaching of equivalence and the expectation of similar pharmaceutical properties.
